

Oli Walker

FULL-STACK DEVELOPER.

WWW.OLIWALKER.ME

Personal Profile

Product focused Full-Stack Developer who loves building front-ends with React, Redux, GraphQL and back-ends with Express, Yoga, Prisma and Koa and also has knowledge of other frameworks, React-Native, Angular and SQL/No-SQL databases.

Enjoys Testing with libraries such as Jest, Enzyme, Mocha, Chai and pushes to work using SCRUM and AGILE methodology to ensure team goals and deadlines are met.

I spend free time learning new skills and keeping on top of ever advancing JavaScript Tech. I strive to adhere to best practices, and to keeping code clean and DRY.

A previous background in adventure sports crafted my ability to work effectively and efficiently with a wide variety of people, whilst falling naturally into leadership roles.

Technologies

- JavaScript
- React
- Redux
- Node
- Express
- Koa
- Angular
- Next
- Sql & noSQL
- GraphQL
- Jest, Mocha, Chai, Enzyme

Work Experience

AKTEK - 2018

FRONT END DEVELOPER - REACT-REDUX

A startup team of developers and data-scientists who aim to offer flexible solutions and address the key challenges faced by organisations operating in fragile environments.

In the front end React team of two we design, develop, test, and implement new features to the Fusion Engine whilst working closely with our clients and our data scientists to tailor the product for their ease of use to attain the most credible data at their fingertips.

Working with - React, Redux, Webpack & various data visualisation tools.

Projects

VERSUS - 2018

Versus is a mobile platform to connect casual athletes by the sports they love to play. I architected and implemented our React client, including state management and data modeling, API interactions through async middleware, and UI+UX. React, Redux, Node, Koa and MariaDB, Apiary, PostMan.

FREE YOUR STUFF - 2018

Free Your Stuff is a progressive web app to enable people to efficiently and easily upload their unwanted items up for the public to take. It allows for very fast uploading and automatic "tagging" with image recognition technology. React, Redux, Koa, Mongo, google API's, cloudinary image manipulation.

DEED - 2018

Deed is an app built for the 2018 Facebook Developer hackathon. It brings communities together through the gamification of common tasks. Angular, GraphQL, MongoDB. Our team of very junior developers received an honorable mention.

Education & Training

CODEWORKS - 2018

Full Stack Software Engineering

- Intense personal software development camp
- Over 1000 hours of training
- Three fantastic projects

SELF LEARNING 2017 - 2018

Variety of different online courses from Lynda and TeamTreehouse & Wes-Bos
